

CYBERGYM and Omegapoint announce new collaboration in the provision of remote cyber training solutions

Tel Aviv, Israel, 20 July 2020 CYBERGYM - a global provider of cyber-readiness solutions, and Omegapoint – A Nordic leading expert in cyber security and secure digitalization - have successfully closed a new deal in which Omegapoint will provide CYBERGYM's cyber training programs and certifications to utility companies, municipalities and government entities throughout the Nordic countries.

In the first stage of this multi-stage project, a range of training programs will be delivered through CYBERGYM's virtual cyber training arena, Virtual Cloud Arena. In the second stage, Omegapoint will commission a full-scale CyberFrame Arena where it will run real-life, on-premise training for participants from a variety of sectors, all of which face an ever-changing range of high-intensity cyber threats.

"CYBERGYM's established Virtual Cloud Arena solution has recently been upgraded and updated to support the massive global transition, prompted by the COVID-19 pandemic, to the remote provision of services in general", says Ofir Hason, CYBERGYM's CEO. "Delivering specialized training via a cloud-based virtual training arena, CYBERGYM continues to provide the optimal response to evolving cyber threats, in a format that suits corporate operational behavior characterized by social distancing policies and vastly reduced attendance at the workplace."

"By providing a secure connection to CYBERGYM's virtual arena, Omegapoint will enable participants to access a wide range of training from their laptops, from basic cybersecurity essentials for general employees, to advanced forensic for those with in-depth technical experience", says Björn Weigel, Chairman of Omegapoint Cyber Security.

About CYBERGYM

CYBERGYM provides tailored cyber-training solutions to organizations around the world. With the most relevant threat model and a technological environment configured to your technological setup, we make sure your people gain the experience they need, as individuals and as a team. CYBERGYM further qualifies your general workforce and executives, delivering an all-inclusive, organization-wide solution.

Founded in 2013 by experienced veterans of Israel's prestigious intelligence organizations, CYBERGYM gives you the peace of mind of knowing that your teams are always ready, and cyber investments are maximized.

About Omegapoint

Omegapoint is Sweden's leading consulting company in cyber security and secure digitalization. The company has had a strong growth since the start in 2001 with customers in both the private and public sectors. Today Omegapoint employs 400 expert consultants throughout Sweden and has a turnover of 50 million Euros.

Omegapoint protects its customers from economic cyber espionage, political warfare and cybercrime. In combination with its security expertise and ability to translate strategy into secure technical solutions, Omegapoint offers its customers a secure digital future.
